

Gaultheria colensoi

COMMON NAME

mountain snowberry

FAMILY

Ericaceae

AUTHORITY

Gaultheria colensoi Hook.f.

FLORA CATEGORY

Vascular – Native

ENDEMIC TAXON

Yes

ENDEMIC GENUS

No

ENDEMIC FAMILY

No

STRUCTURAL CLASS

Trees & Shrubs - Dicotyledons

NVS CODE

GAUCOL

CURRENT CONSERVATION STATUS

2017 | Not Threatened

PREVIOUS CONSERVATION STATUSES

2012 | Not Threatened

2009 | Not Threatened

2004 | Not Threatened

BRIEF DESCRIPTION

Bushy sprawling shrub bearing small oval leathery toothed leaves on hairy twigs inhabiting central North Island mountains. Hairs on twigs pale, downy. Flowers white, bell-shaped, in cluster at tip of twigs. Leaves alternating on stem, 8-12mm long by 5-9mm wide. Fruit a dry capsule.

LIFE CYCLE

Seeds are wind dispersed (Thorsen et al., 2009).

ETYMOLOGY

gaultheria: Named after Jean François Gaultier of Quebec (6 Oct 1708-10 July 1756) by the Scandinavian Pehr Kalm in 1748.

colensoi: Named after William Colenso (7 November 1811 - 10 February 1899) who was a Cornish Christian missionary to New Zealand, and also a printer, botanist, explorer and politician.
