

## Help us plug the final image gaps on the New Zealand Plant Conservation Network website

Can you help us plug the last gaps in our native vascular flora image library? Although we have illustrated 92% of New Zealand's native vascular plant species we are still seeking images for 192 plant taxa – see table below. If you can help us please send named images to the Network at [info@nzpcn.org.nz](mailto:info@nzpcn.org.nz), with the name of the photographer and details of where the image was taken. If you have multiple images please post them on a CD (NZPCN, PO Box 16-102, Wellington). Otherwise – here is a perfect photographers hit list for your spring field trips.
